## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claims 18-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 24 July 2006.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bicocchi (US Patent No. 2,608,796).

Bicocchi discloses a housing; a sounding board coupled to the housing, the sounding board defining a main air channel; a reed coupled to the sounding board adjacent the main air channel to produce sounds when air passes through the main air channel; a pressure point structure disposed in the housing, the pressure point structure engaging the reed at a reed contact location, the pressure point structure urging the reed toward the sounding board at the reed contact location, the pressure point structure being movable relative to the reed, as air is forced across the reed to change a

free end length of the reed which is free for sound producing vibrations; and a rigid cylindrical member configured with a spiraled groove portion therein, so that rotation of the rigid cylindrical member results in relative longitudinal movement with respect to the housing, which longitudinal movement limits a range of variability of the free end length.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bicocchi (US Patent No. 2,608,796) in view of Primos, Jr. et al. (US Patent No. 5,803,785)

Bicocchi discloses the claimed invention except for a bellows.

Primos, Jr. et al. teach a game call having a housing in the form of a bellows.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a housing having a bellows as taught by Primos, Jr. et al., since such a modification permit alternate actuation of the game call.
